**SUMMARY** Full-stack & mobile engineer shipping AI products end to end — from an App Store calorie tracker with 250+ active users to an agent that reviews pull requests.

I'm Sharath Chenna, a fourth-year engineering student at BITS Pilani – Hyderabad Campus in India. I'm passionate about technology and software development, with experience in backend and frontend development, DevOps, and mobile app development using frameworks like Flutter and React Native. Some projects I've built include MacroBalance, an AI-powered calorie tracking app, and Animator.chat, a platform for creating animated AI videos.

**EXPERIENCE** **Software Developer Intern · Swecha Telangana** MAY 2024 – JULY 2024 · REMOTE

- Built a Single Sign-On (SSO) system used across Swecha's digital platforms.
- Helped create the Swecha Telugu Corpus App, organising Telugu language data for training LLMs.

**PROJECTS** **MacroBalance — Snap a meal. Get the macros.** App Store

MacroBalance is a revenue-generating calorie tracking app with 250+ active users that allows you to track your calories and macros. It uses the Gemini API to generate calorie and macro estimates based on your food intake.

FLUTTER · NEXT.JS · DART · POSTGRESQL · SUPABASE · GEMINI

**PRReviewBot — Code review, on autopilot.** github.com/sharathchenna/prreviewbot

An AI-powered code review agent that automatically analyzes pull requests using Google's Gemini models. Specialized for Flutter/Dart code, it provides context-aware feedback, catches bugs, enforces best practices, and posts intelligent review comments directly to PRs. Deployed on Google Cloud Run with FastAPI backend.

PYTHON · FASTAPI · GOOGLE ADK · GEMINI · NEXT.JS · DOCKER · GCP

**Animator.chat — Describe it. Watch it move.**

Animator.chat is a platform for creating animated videos using AI. It allows you to create animated videos using AI and share them with your friends and family.
